

Institute of Physics of the Polish Academy of Sciences Scholarship for a PhD Student

Job ID: #JOB12/2017

Job Description

Job Title: PhD student

Job Summary:

The PhD student will be involved in research in the frame of the project "The anisotropy of 3D lattice strain distribution and plastic relaxation in heteronanostructures investigated by tomographic electron diffraction" devoted to investigation of stress relaxation phenomena by advance transmission electron microscopy.

Job Description:

The PhD student will participate in research devoted to determination of the local deformation of the crystalline lattice of individual strained semiconductor heteronanowires and relationships between their structure and properties using advance electron microscopy techniques. The performed work will be the basis for doctoral thesis.

Profile of a candidate for the position:

- Master's degree in physics, applied mathematics, computer science or related fields, obtained after 2014,
- good spoken and written English,
- ability to work in a team,
- an additional advantage will be programming skills in one of C ++, Python Matlab, Matematica or related programming languages.

Main research field: Physics **Sub Research Field:** Solid state physics

Career Stage: Early stage researcher or 0-4 yrs (Post-graduate)

Research Profile ([details](#)): First Stage Researcher (R1)

Type of Contract: Temporary for the 30 month term

Status: Full-time

Salary: 3000 PLN per month (untaxed scholarship).

Application details

Application deadline: July 25, 2017. Later applications may also be considered.

Required materials:

- Curriculum Vitae
- List of publications

All materials should be submitted in electronic form to the address: jobs@ifpan.edu.pl with Job ID in the subject.
