

SEMINARIUM Z MAGNETYZMU I NADPRZEWODNICTWA

Uprzejmie zawiadamiamy, że w **ŚRODĘ**

24 listopada 2010 r., o godz. 10:00

w sali 203 (bud. 1) odbędzie się seminarium, na którym

Prof. Xin Yao

Department of Physics, Shanghai Jiao Tong University, Shanghai, China

wyłosi referat na temat:

„Study of top-seeded solution-growth and melt-growth of single crystal, thick film and bulk of REBa₂Cu₃O_z (RE = rare earth) superconductors”

In this presentation, the recent progress in the growth of REBa₂Cu₃O_z superconducting materials will be introduced, focusing on the growth of high quality single crystals, the orientation control of thick films and the preparation of high performance bulks.

Serdecznie zapraszamy
