

Poster Session I

- P-1 **Maciej Blaszczyk** , **Michal Jamroz**, **Andrzej Kolinski**
Protein Structure Prediction Using CABS a Consensus Approach
- P-2 **Jakob Bohr**, **Kasper Olsen**
The Close-Packed Helix
- P-3 **Grzegorz Chwastek**, **Christoph Herold**, **Petra Schwill**
Interactions of BAR Proteins with Lipid Membranes
- P-4 **M. Chwastyk**, **P. T. Rozanski**, **M. Zielinski**
Atomistic Calculation of Screened Coulomb Interactions
in Semiconductor Nanostructures.
- P-5 **Maja K. Cieplak**, **Marc R. Fabian**, **Nahum Sonenberg**
Functional Insight into the Role of GW182 Proteins in
microRNA-mediated Repression
- P-6 **Marta Dudek**, **Julia Romanowska**, **Tomasz Witula**, **Joanna Trylska**
Combined Theoretical and Experimental Study of Amikacin and
Its Ribosomal Binding Site
- P-7 **Catarina Fernandes**, **Silvia Estácio**, **Heinrich Krobath**, **Patricia F. N. Faísca**
Sensitivity of Go Model to Fine Details of the Native Structure
- P-8 **Ángel Gómez-Sicilia**, **Marek Cieplak**,
Mariano Carrión-Vázquez
Simulating Fluctuations Of Neurotoxic Proteins Using Monte Carlo
- P-9 **Dominik Gront**
Protein Structure Modeling Guided by Fragmentary NMR Data
and SAXS Scattering Profiles.
- P-10 **J. Grzyb**, **R. Łuczowska**, **D. Noy**
A Redox-chain Maquette - a New Protein to Study Electron
Transfer
- P-11 **Marek Kaczyński**, **Tomasz Borowik**
The Method for Estimation the Exchange of Amphiphiles Between
Lipid Aggregates

- P-12 **Borys Kierdaszuk**
From Discrete Multi-exponential Model to Lifetime Distribution Model and Power Law Fluorescence Decay Function
- P-13 **H. Krobath, S. G. Estácio, P.F.N. Faisca, E.I. Shakhnovich**
Identification of Aggregation-prone Intermediate States in the Folding Pathways of spc-SH3 Amyloidogenic Variants via Discrete Molecular Dynamics Simulations
- P-14 **Anna Kropiwnicka, Joanna Zuberek, Joanna Kowalska, Maciej Lukaszewicz, Jacek Jemielity, Janusz Stepinski, Joanna Kufel, Edward Darzynkiewicz**
eIF4E Family Members from *Arabidopsis thaliana*: Binding Affinities for Cap Analogs
- P-15 **D. Kubacka, J. Zuberek, J. Stepinski, J. Jemielity, N. Minshall, N. Standart, E. Darzynkiewicz**
Structural and Functional Features of *Xenopus* eIF4E1b Protein
- P-16 **A. Liwo, Y. He, M. Maciejczyk and H.A. Scheraga**
A Coarse-grained Model of Nucleic Acids Based on Interaction between Base Multipoles
- P-17 **K. Milowska, M. Birowska, J. A. Majewski**
Structural and Electronic Properties of Functionalized Carbon Nanotubes and Graphene Layers
- P-18 **Katarzyna Milowska, Lidia Fornal, Teresa Gabryelak**
The Impact of PAMAM Dendrimers on Catalase Activity and Structure
- P-19 **Grzegorz Nawrocki, Marek Cieplak**
Amino Acids at ZnO-water Interfaces in Molecular Dynamics Simulations
- P-20 **Anna Wypijewska, Anna Nowicka, Katarzyna Wnek, Joanna Kowalska, Marta Kulis, Elzbieta Bojarska, Maciej Lukaszewicz, Jacek Jemielity, Edward Darzynkiewicz**
Searching for DcpS Enzyme Inhibitors Among Cap Analogs Modified In The Phosphate Chain
